

Box&Box was formed in 2004 as a business branch of SO.GE.TRA. Srl, a company specializing in logistics, transport and packaging.

In the space of a few years, the brand won a leading role in the sector of prefabricated metal structures and containers at international level. Box&Box grew from its head office, at the freight village ("interporto") of Parma, and opened sales branches in Italy and in Europe.

An attentive, targeted and effective customer service is at the root of the success that has taken the company's products all over the world. Together with the quality of cabins, shipping containers and modified containers, the company's team guarantees a consultancy and design service able to meet a multitude of needs and adapt the cabins for living, work or exhibition use, including special structures such as those required for making insulated storerooms, cabins for high altitudes, sanitary facilities, offices and work camps without forgetting spaces for exhibitions and hospitality.

In addition to selling, Box&Box hires out new and used prefabricated structures and containers, and, thanks to the support of the group it belongs to, it also oversees the transport and storage of the products all over the world.

Box&Box quality is ISO 9001 / UNI EN ISO 9001:2000 certified.
